

Installation Steps

Step 1: Surface Preparation

1. Thoroughly clean the playing surface to remove all dust, dirt, or debris.
2. Ensure the surface is flat and free of irregularities.
 - **Important:** Areas with height differences greater than 6 mm may cause air pockets under the mat.

Step 2: Layout of the Pieces

1. Unroll and place the 18 pieces (9m long x 1m wide) according to the order indicated in the diagram.
2. Adjust each piece to properly align with the game lines and the indicated borders.

Step 3: Securing the Pieces

1. Apply double-sided or single-sided tape along the edges of each mat, focusing on the junctions between the pieces.
 - **Important:** Make sure the pieces are well aligned before permanently securing the adhesive tape.
2. Press the mats together firmly to ensure a solid attachment and prevent any shifting.
3. Walk and press along the junctions to ensure proper adhesion of the tape.
